Daily analytics

Traveling assets

Assets last recorded in an unidentified location, i.e., neither a hospital or one of your distribution centers.

Stagnant assets while traveling

Assets located in the same unidentified location (i.e., neither a hospital or one of your distribution centers) for at least 3 days.

Stagnant assets

Assets located in the same facility (i.e., a hospital or one of your distribution centers) for at least 5 days.

Accuracy

Estimated distance between assets' reported position and real location:

High accuracy : actual location est. less than 100 meters from transmitted location.

Medium accuracy : actual location est. between 100 and 2000 meters from transmitted location.

Low accuracy : actual location est. more than 2000 meters from transmitted location.

Weekly highlight

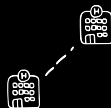

Assets delivered to hospital

A count of how many times your assets have visited a hospital.

Loan cycles

Records of a full loan cycle: an asset left the distribution center, visited (at least) a hospital, then came back to a distribution center.

In-field transfers

Records of a Hospital-to-Hospital journey (without passing by a warehouse, distinct hospitals only).

Vagabond assets

Assets that have been moving between multiple unidentified locations for 5 days or more (without passing by any hospital or distribution center).

An example of asset trajectory
